EXPERIMENT NO. 2

TITLE :

To create mark-sheet using Spreadsheets like MS Excel.

OBJECTIVE :

- To learn how to create Mark sheet.
- To learn how to use MS Excel.

THEORY :

Microsoft Excel is a spreadsheet program that allows users to organize, format, and calculate data. It is a powerful tool for data visualization and analysis.

Excel allows the users to create, edit, and format spreadsheets, containing numerical data, formulae, and chart. It is commonly used for the financial calculations, budgeting, data analysis, and various business and academic purposes

DEMONSTRATION :

Key word for formulae:

- ◆ For Sum:
`=SUM(C3:G3)`
- ◆ For Pass/Fail
`=IF(AND(C3>=35,D3>=35,E3>=35,F3>=35,G3>=35),"pass","fail")`
- ◆ For Percentage
`=IF(J3="pass",IF(H3>=80,"DIST",IF(H3>=60,"FIRST",IF(H3>=50,"SECOND",IF(H3>=40,"THIRD")))), "FAILED")`
- ◆ For Division
`=IF(J3="pass",IF(H3>=80,"DIST",IF(H3>=60,"FIRST",IF(H3>=50,"SECOND",IF(H3>=40,"THIRD")))), "FAILED")`

EXPERIMENT NO. 4

TITLE :

To create auto motors list with features using Spreadsheets like MS Excel.

OBJECTIVE :

- To learn how to create List.
- To learn how to use MS Excel.

THEORY :

The modern automobile is a complex technical system employing subsystems with specific design functions. Some of these consist of thousands of component parts that have evolved from breakthroughs in existing technology or from new technologies such as electronic computers, high-strength plastics, and new alloys of steel and nonferrous metals. Some subsystems have come about as a result of factors such as air pollution, safety legislation, and competition between manufacturers throughout the world.

Microsoft Excel is a spreadsheet program that allows users to organize, format, and calculate data. It is a powerful tool for data visualization and analysis.

Excel allows the users to create, edit, and format spreadsheets, containing numerical data, formulae, and chart. It is commonly used for the financial calculations, budgeting, data analysis, and various business and academic purposes.
